

Classic Distortion	I	Tube	10hz-20khz	22.3	Compressed distortion with a lot of bandwidth low gain, low sustain.	A Jee with l old S Group and h
Presence	I & II	Tube	30hz-37khz	24.1	Has bump from 1khz-20khz with peak at 7khz. Group I module at all other frequencies. Great up front sound.	Adder clean over
Classic	II	Tube	75hz-40khz	33.0	A little "dirtier" and brighter than normal, with 6db more gain.	Three (4) U Delux 60 w
Low Cut Classic	II	Tube	200hz-20khz	29.5	Same as above, but cuts lows at 160hz at 6db per octave.	Use gain
Hi-Gain	III	Tube	10hz-40khz	48.3	Lots of sustain and gain. Great harmonics.	Even and
Hi-Gain Hybrid	III	Hybrid	15hz-40khz	44.4	Tube with solid state drive (hybrid). More hi end than Hi-Gain. Hot and crunchy. Great sustain.	Odd meta

Group I
Lowest noise
Lowest gain
(low distortion)
Most bandwidth

Group II
Medium noise
Medium gain
Medium bandwidth

Group III
Most noise
Most gain
Least bandwidth
